Job Title : Mobile Application Developer (Android & iOS)

Organization: Airawat Research Foundation

Location : IIT Kanpur (In-Office)

Experience : Required Minimum 3 Years

Job Type Full-time

Job Summary

Airawat Research Foundation is looking for an experienced **Mobile Application Developer** with strong expertise in **Android and iOS application development**. The role is based in **Kanpur (in-office)** and involves building, maintaining, and optimizing mobile applications that support the foundation's research and innovation initiatives.

Key Responsibilities

- Design, develop, and maintain mobile applications for **Android and iOS platforms**
- Develop applications using **Android (Java/Kotlin)** and **iOS (Swift)**
- Collaborate closely with designers, backend developers, and research teams
- Integrate RESTful APIs and third-party services
- Ensure application performance, quality, and security
- Debug, test, and maintain existing applications
- Handle app deployment and updates on **Google Play Store** and **Apple App Store**

Required Skills & Technologies

- Minimum **3 years of hands-on experience** in mobile application development
- Strong expertise in **Android development**
- Strong expertise in **iOS development using Swift**
- Experience with REST APIs, JSON, and third-party integrations
- Knowledge of Git or other version control systems
- Understanding of mobile UI/UX best practices

Preferred Qualifications

- Experience with Firebase or similar backend services

- Knowledge of mobile app security and performance optimization
- Prior experience in research-oriented or impact-driven projects

Educational Qualification

- Bachelor's degree in Computer Science, IT, or a related field (preferred)

Why Join Airawat Research Foundation?

- Work on impactful, research-driven applications
- Collaborative and learning-focused work environment
- Long-term growth opportunities
