Job Title: Software Engineer
Number of Positions: 4

Minimum Qualification: Bachelor's or Master's degree in Computer Science or a related field (BCA, MCA, B.Tech, M.Tech).
Candidates should have proficiency in at least one programming language such as Python, or experience with React.js and/or Node.js.

Job Profile / Roles & Responsibilities:

1. Design, develop, test, and maintain scalable and efficient software applications using modern programming languages and frameworks.
2. Collaborate with cross-functional teams to gather requirements, define solutions, and deliver high-quality software features.
3. Participate in code reviews, debugging, and performance optimization to ensure software reliability and quality.
4. Continuously learn and adopt new technologies, tools, and programming languages as required by project needs.

How to Apply:
Applications must be submitted **strictly through online mode**. Applications submitted through any other mode will not be accepted.
